THE GAZETTE.

THURSDAY JULY 8.

A special to the Evening Wisconsin from Spencer, Wis., says the entire hamlet of Romeo, in Marathon county, burned at 1 o'clock this afternoon, including the saw-mill, planing-mill, 5,000,000 feet of lumber, store, boarding house, and dwellings of William Vanhoosear. Loss, $150,000; insurance, $50,000. The woods are on fire, and further particulars can not be obtained.

Remarks an observing newspaper, the Chicago Journal: "The country wouldn't have cared much for the president asking congress to appropriate about $30,000 for repairs and furniture in the white house, but for the fact that the sixty pension bills vetoed by him involved an aggregate amount of less than $70,000. There is want of economical consistency in these figures that is painfully conspicuous."

Some of the newspapers are still harping on Logan's refusal to vote for the Payne investigation, and charge that in doing so he was dishonest and wanted to shirk an important responsibility. General Logan's answer to the charges is this:

The case had to be investigated in a legal way, and senators had to decide as lawyers. The question before the election committee was not whether money had or had not been used to corrupt members of the Ohio legislature in their votes for senator. It appeared in evidence that money was used in a caucus at which a senatorial nomination was made; but it did not appear that a dollar was used in the senatorial election itself. "The senate", said General Logan, "can not investigate the proceedings of a caucus, and nothing but caucus proceedings were offered in evidence. There was no proof of bribery in either house of the legislature, after the caucus had nominated Mr. Payne. We stood upon that ground, and made our majority report upon that ground."

Certain of the senators—Messrs. Ingalls and Edmunds among the number—insist that the Sawyer amendment to the river and harbor bill which proposes an amendment of $150,000 for the purchase of the Sturgeon Bay and Lake Michigan ship canal, is a private speculation; less politely, a private steal upon the government. Inasmuch as the United States has ceded at least 200,000 acres of land to the state of Wisconsin with which to build this same canal, there would seem to be some ground for the charge thus made.

But Senator Sawyer maintains that there is no job, no private interests to be subserved, no imposition upon the government in any form. He insists that the proposed purchase is solely in the interests of lake commerce.

If any man can convince the opposing senators that these statements are true, Senator Sawyer is that man.—*Evening Wisconsin.*

Well, it seems that Senator Sawyer has convinced the senators. But on that point the senators are easily convinced—as a rule. The amendment has passed the senate after being amended as proposed by Senator Spooner to the effect that it appropriates $150,000 for the purpose of making free of toll the commerce through the canal. This substitute does not recognize the canal company as owner of the improvement, but simply made the canal what the original act of congress contemplated—a canal for free commerce.

It is said that the London papers, except the Morning News, took no notice of Mr. Beecher's sermon on Sunday in the City Temple, the largest non-conformist tabernacle in that city. He had a splendid audience, and preached a splendid sermon on "Love, or the law of religion." The secular press of London has not forgotten the first visit of Mr. Beecher to England in 1863. Then he went there in company with Archbishop Hughes, of the Catholic church, to plead the cause of the Union against British sympathizers. There is no other instance in modern times in which eloquence and brilliant oratory did so much effective work as Mr. Beecher's in England in the fall of '63. He was then in his prime. He was the foremost pulpit orator of the world. His power over an audience was something miraculous. His speeches in London, Liverpool, Manchester, Birmingham, Sheffield, and other leading cities, had good effect. They changed the current of thought in England in regard to the rebellion. But the secular press of London has not forgotten that remarkable time and Mr. Beecher's remarkable powers, and so it thought to snub him. It is an act that belittles the press of London far more than it does Mr. Beecher.

The Chicago Journal notices the fact that a democratic newspaper announces that "Senator John Sherman is worth $5,000,000," and implies that it is something to his discredit. The same journal says that James G. Blaine is worth a million of dollars, and it asks "where he got it." It does not seem to have occurred to this newspaper critic that H. B. Payne, the coal-oil senator from Ohio, and Mr. Sherman's colleague, is worth probably $10,000,000; that Senator Payne's son-in-law, Secretary of the Navy Whitney, is a millionaire two or three times over, and that many democrats are wealthier than the most wealthy republicans. In regard to the extremely wealthy democrats the fact appears to be that many of them made their money by wrecking railroads and in other monopoly enterprises while belonging to a party that professed to be anti-monopoly in its principles, and especially devoted to the interests of the laboring men and masses as opposed to the interests of corporations." The Journal might have remarked in answer to this that some time ago it was stated on the best of authority—John Sherman himself—that he was not worth one-fifth of five millions. And so in the campaign of '84, when the charges were made that Blaine was a millionaire, it was proven that his entire property was not worth more than $600,000, and much of this was but poorly invested. It was also said that the late Senator Miller, of California, was worth several millions, and the newspapers wondered how he made so much since the close of the war. But after his death early last spring, and and when his will was admitted to probate, it was discovered that his entire estate, bonds, book account and every thing, did not exceed $350,000.

CONTINUED TORY SUCCESSES.

Sexton, However, Gives the Parnellites an Extra Seat—Latest Returns.

LONDON, July 8.—Every return thus far received from the counties of England show a vast increase in the Tory vote. In the northeast division of Cork Mr. T. Leamy, Parnellite, has been elected. In the west division of Belfast Mr. Thomas Sexton, Parnellite, received 3,882 votes to 3,276 for Alderman J. Haslett, Conservative. At the last election Mr. Haslett was elected, receiving 3,778 votes to 3,761 for Mr. Sexton. The Parnellites are enthusiastic over Mr. Sexton's great victory. The Tories continue winning in the English counties by sweeping majorities. They have won seats in Cambridge, the Newport division of Shropshire, the Wellington division of Somerset, the Stratford division of Warwickshire, and the Nuneaton division of Warwickshire. They have also won Carnarvon division in Wales. The Liberals have won in the Elgin district, Scotland, which beat was previously held by a Liberal Unionist. The Tories have thus far gained 42 seats, the Unionists 2, the Gladstonians 18, and the Parnellites 1.

Mr. J. E. McCartney, Conservative, has been declared elected for Antrim, the nomination of the Nationalist candidate having been pronounced informal. The Tories gained seats Wednesday in North and South Westham, in Accrington and in Southport, Lancashire. The net Unionist gain to midnight is twenty-nine. Mr. H. Crawford, Gladstonian, notorious as the plaintiff in the Crawford-Dilke divorce suit, has been elected for the northeast division of Lanarkshire. At midnight the totals were: Tories, 240; Unionists, 47; Liberals, 119, and Parnellites, 55.

The Minis-terialists gain the seat for Carmarthan, which was held in the last parliament by a Unionist.

Home Rule Meeting a Boston.

BOSTON, July 8.—Tremont temple was only partly filled at Wednesday night's home rule meeting. Mayor O'Brien presided, and addresses were made by Father Tooling, of Newport; Father Bodfish, of Cape Cod; Thomas Riley, Judge Chamberlain, John E. Fitzgerald, W. W. Doherty, and James Boyle O'Reilly. A letter of thanks was read from Parnell, saying that "it would not be easy to overestimate the great importance of enthusiastic expression of American opinion such as yours at the present moment."

ST. LOUIS ANARCHISTS SET FREE.

No Harm to Talk Red-Eyed Chaos in the United States.

ST. LOUIS, July 8.—The motion to quash in the case of Frederick H. Bergman, Gottlieb Jakobowski, Justus Schwab and Otto Fricke, the Anarchists charged with unlawful assembly, was argued Wednesday afternoon in the court of criminal correction, James J. McBride representing the defense, and Prosecuting Attorney Claiborne the state. Judge Rooman sustained the motion to quash, holding that there was nothing to show that the alleged unlawful resolutions as offered were adopted. If the resolutions were only offered, and there was nothing to show that they had been adopted, it was merely an opinion, and every one was entitled to his opinion in this country. Besides, this government was strong enough and there was no use in inspiring timidity by paying any attention to the vaporings of a few men who held peculiar views on social and political questions. It was time enough to prosecute when they were guilty of some overt act.

THE PHILADELPHIA BOND STEAL.

Nearly All Outstanding Bonds In and No Fraudulent Ones Found.

PHILADELPHIA, July 8.—The total amount of loan certificates returned to the office of the Chesapeake and Delaware Canal Company up to Wednesday afternoon was $1,976,648. Of the legitimate outstanding loans there are $1,993,750, so that this leaves only $17,102 to be accounted for, or about $825,000, including the fraudulent issue, according to the fugitive treasurer's figures. The directors are very anxious that the holders of this surplus will make return of their certificates without further delay, thereby facilitating the work of the accountant in clearing up the intricate affairs of the company. From all the bonds that have been turned in the directors have not been able to detect a single fraudulent one. This gives some plausibility to the theory that they are held by some people who are unwilling to return them. If this is the case interesting developments may follow after the amount of the legitimate outstanding loan is balanced.

REMARABLE LIGHTNING STROKE.

A Colorado Man's Miraculous Escape from Instant Death.

DENVER, Col., July 8.—George S. Edwards was struck by lightning, Sunday, while crossing Iron Hill. Though severely injured, he recovered consciousness in fifteen minutes, and will probably get well. The lightning struck him on the left cheek, knocking him senseless, passed across his breast to his right foot, thence across, coming out of the left foot. A hole like a bullet hole was made in the foot.

Edwards' clothing was torn to shreds and both boots were knocked off. The ground where he stood was torn up. The course of the lightning over his body is marked by a red streak an inch wide. The worst injury is to his lung, the shock causing a hemorrhage and serious loss of blood. His body was covered with blisters and burns. This is said to be the first known person being struck by lightning at this altitude (10,500 feet above the sea). Edwards' peculiar injuries are the subject of much interest among medical men.

Indicted for Performing an Abortion.

NEW HAVEN, Conn., July 8.—The grand jury Wednesday returned a true bill against Dr. Frank Gallagher of this city, indicting him for murder in the first degree. On Saturday, April 6, Miss Sadie Heineman died at the state hospital of blood poisoning of the most virulent type, the result, it is alleged, of an abortion performed by Gallagher. Dr. Gallagher is the oldest son of the Hon. James Gallagher, chairman of the Democratic state committee. About the time of the death of the girl Gallagher left town and has not returned since, but the authorities claim to know of his whereabouts, and say that he will be in custody inside of twenty-four hours.

An Important Function Stimulated.

The kidneys exercise most important functions, which are so wearisome that they tax to the utmost the strength and endurance of these busy little organs. Every breath, every pulsation of the heart, every movement of a limb, every thought, makes waste, and necessitates the development of new atoms. The used up particles in the blood are sifted from it and dissolved in a watery fluid by the kidneys, which then discharge this fluid into the bladder. A train of disasters to the system would follow if these "ashes", so to speak were not thoroughly strained off and discharged. This is the case when the kidneys become inactive. Hostetter's Stomach Bitters, by restoring their activity, not only keeps open a most important outlet for impurities, but prevents diseases of the kidneys themselves, which when inert becomes liable to fall a prey to diabetes, Bright's disease, nephritis, albuminuria, and other maladies specially incident to them, which, although not specially rapid in their progression, are particularly obstinate and fatal.

THE POLITICAL MERCURY.

BOILING HOT OVER LOCAL OPTION IN MISSISSIPPI.

Temperance and Anti-Temperance People at Work with Their Coats Off—Kansas Republicans Meet—St. John Denounced—Prohibition Not an Issue—Judge Treat to Resign—Notes.

VICKSBURG, Miss., July 8.—There has not been so much excitement in years as there is now in Mississippi over the local option elections. The question comes to a vote in this county on the 17th instant. Everybody is aroused and at work on one side or the other. The women and children are an active element for the Prohibitionists, and are leading and directing the men. The prohibition people are working night and day, and have prominent and successful workers from other sections assisting them in a thorough organization. Speeches, the forming of clubs and barbecues in their interest are found nearly every day in each district of the county. The anti-prohibition people are not idle by any means, but so far they have not been so aggressive as their opponents in organization, but their executive committee have asked that a division be given in public discussion, and if a favorable response is received the excitement will be greatly increased. Some bad feeling is manifested, but so far no violence has occurred.

DROPPED OUT OF POLITICS.

The Prohibition Question in Kansas—Republican Convention.

TOPEKA, Kan., July 8.—The Republican state convention met here Wednesday. J. R. Hallowell, ex-United States attorney, was elected chairman. His address to the convention, in which he denounced St. John as a traitor and arraigned Cleveland for his vetoes of pension bills, created wild enthusiasm. The principal contest is upon the nomination of McCabe for auditor of state. McCabe is a colored man and has served two terms acceptably, and the principal fight against him really arises from jealousies among his own race.

The renomination of John A. Martin for governor and the balance of the old officers, with the exception of McCabe and Howe, has long been conceded. The prohibition question does not affect the convention in the least; that question in fact has been dropped out of Kansas politics, prohibition having been accepted as an institution that has come to stay. The Anti-Prohibitionists' wing of the party, which was strong enough to defeat St. John for governor for his third term and elect Glick, Democrat, have abandoned their opposition to the measure.

Judge Treat to "Go Out of Harness."

SPRINGFIELD, Ill., July 8.—The Democratic lawyers of central and southern Illinois are considerably worked up over a well-defined rumor to the effect that Hon. Samuel H. Treat, judge of the court of the United States for this district, contemplates an early retirement from the bench. Judge Treat was appointed to the position about the year 1855. He has decided some of the most important cases in the history of the judiciary of the country, and gained, on account of his opinions, a most enviable name among the members of the legal fraternity. He is most highly esteemed throughout the west, and will retire from the bench with the best wishes of thousands of personal friends. Judge Treat has passed the age of retirement, and a month or two since expressed to a number of personal friends a disposition to withdraw from public life.

Congressional Nominations.

VICTORIA, Tex., July 8.—The Democratic congressional convention of the seventh district assembled here Wednesday and unanimously renominated Hon. William H. Crain. Resolutions were adopted congratulating the country upon its "redemption from Republican misrule," and unconditionally indorsing the president's administration.

INDIANAPOLIS Ind, July 8.—At Rockville, Wednesday, the Democratic congressional convention nominated John E. Lamb. Mr. Lamb's nomination to be United States district attorney for Indiana is now pending in the senate.

ST. PAUL, Minn., July 8.—John Lind was nominated for congress by the Republicans of the second district, to succeed Wakefield, the present member.

Dry Towns in Missouri.

MACON, Mo., July 8.—The city council recently passed an ordinance prohibiting the sale of liquor within the city limits in less quantities than one gallon. The proprietors of the saloons Tuesday presented to the county court their applications for licenses, but they were all refused, and Wednesday there was not an open saloon in Macon. The same state of affairs exists in Linneus.

Who Grand Jury Will Investigate.

ST. LOUIS, Mo., July 8.—The charges of bribery made against several members of the municipal assembly are to be investigated by the grand jury. It is alleged that one member of the house of delegates, who was elected by corporations for the benefits to be derived, bribed two other members by paying $2,000 each for their votes in securing a franchise for the Forest Park & Carondelet railway. A number of other charges of a similar character are made, and it is believed several cases can be sustained.

Striking for Over-Time Pay.

BIRMINGHAM, Ala., July 8.—The foundry of the Lynn Iron works, the most extensive in the city, is shut down by a strike of the moulders for pay for over time. For several months the Linn works has been so crowded with orders that they have had frequently to work the moulders into the night in order to get out their work. Lately the moulders have been wanting pay for occasional over-time which is unavoidable, and the management refused, which resulted in a strike of the full force.

One Thousand Painters Strike.

NEW YORK, July 8.—About 2,000 painters quit work in Brooklyn Wednesday on account of an attempt by the bosses to require them to work ten hours per day at 30 cents per hour. They have been getting $2.75 for eight hours' work. The bosses say they cannot afford to pay this, and they do not care how long the men remain out.

Two Suspensions at Chicago.

CHICAGO, July 8.—John W. Rumsey and George Ellison, board of trade men, suspended Wednesday. Rumsey got on the wrong side of the market on pork and wheat, and oats pushed Ellison to the wall. Rumsey says he will pay 100 cents on the dollar. Ellison's liabilities are put at $300,000.

A Strike Against W. P. Rend.

PITTSBURG, July 8.—The two hundred and fifty miners engaged by W. P. Rend at McDonald's Station, on the Pan-Handle railroad, went on a strike Wednesday. They now demand 38 cents instead of 36 cents per ton for loading coal.

Dr. Pierce's "Pellets" the original "Little Liver Pills" ("sugar-coated) cure sick and bilious headache, sour stomach, and bilious attacks. By druggists.

WIPED OUT COMPLETELY.

FIRE SWEEPS AWAY THE VILLAGE OF ROMEO, WISCONSIN.

All the Inhabitants Homeless and Housed by a Neighboring Town—Loss About $150,000—Muncie, Indiana, Devastated by the Flames—Two Blocks Burned, with a Loss of $75,000.

MILWAUKEE, July 8.—The little town of Romeo, in Marathon county, was entirely destroyed by fire Wednesday afternoon. Romeo is a station on the Wisconsin Central railroad, about forty miles above Stevens Point. It was a lumber town which, like many others in that part of the state, had grown up about a saw-mill started for the purpose of working up the pine timber in the vicinity. As the wires are down, details are meager. It is not known whether the fire originated in or about the mill or swept out of the surrounding forest. The lack of rain and general dryness all over the state lead to the latter theory.

When the fire first appeared a telegram was sent to Stevens Point asking for help. An engine was sent at once on a special train, but arrived too late to be of any service, except to prevent the distruction of the bridge over a small stream near the town. The progress of the flames was such that very few household effects were saved. The presence of large piles of lumber in and about the place aided materially in the rapid spread of the fire. Besides the saw-mill, planing-mill and dwelling-houses, over 5,000,000 feet of lumber was destroyed; 1,000 feet of track was so twisted and warped by the heat that it had to be relaid. The loss will aggregate $150,000, with an insurance of $60,000. A train was sent to take the homeless villagers to an adjacent town, where accommodations were found for them by the hospitable inhabitants. After having wiped out the village, the fire swept off into the forest and ate its way to the westward.

LATER.—Late advices are that eleven dwelling-houses, one boarding-house, two large barns, two warehouses, the saw mill, planing mill, two carloads of flour, 5,000,000 feet of lumber and 5,000,000 of shingles were burned. The loss will be $150,000; insurance, $50,000. Sixty men are thrown out of employment and twenty-seven families left destitute. The origin of the fire is unknown, but it is supposed to have caught from a freight-train engine. The woods south of Romeo are all on fire, and men and women are out fighting it as best they can. Van Hoscar's mill and buildings are totally destroyed. His losses aggregate about $130,000.

VICIOUS BLAZES AT MUNCIE, IND.

Destruction of $75,000 Worth of Property—Some of the Losses.

MUNCIE, Ind., July 8.—At 7 o'clock Wednesday evening great volumes of smoke were observed coming from the livery stable owned by A. F. Patterson, and managed by J. M. Thomas, situated on South Walnut street, this city. Almost simultaneously with this great sheets of flame burst forth, and before the fire department could arrive the fire was beyond control. A strong wind blew from the northwest, and all the buildings in the immediate neighborhood were in great danger, and despite all efforts to save them two blocks were burned away. The fire spread from the livery stable to Thomas' residence adjoining, and in a few minutes it, with its entire contents, was destroyed. Thomas' entire loss is placed at $7,000, while Patterson's loss on building is $8,000, with no insurance on either.

The flames spread rapidly, and notwithstanding several streams of water were by this time pouring upon them, their destructive course could not be stayed.

Samuel Anthony's residence property lay next in the track of the fire, and was totally consumed.

Across the street from the livery stable stood the National house, a large three-story brick hotel, one of the best hostelries in eastern Indiana. The flames leaped in at the windows of this magnificent structure, and now nothing stands of it but its charred and blackened walls. It was owned by E. E. Georgia, whose loss on building and furniture is $80,000. Many guests lose heavily. No insurance.

At this point the fire was brought under control, aid having arrived from Union City. Other property in the neighborhood was seriously damaged, and the total loss can not be less than $75,000. Those who have sustained losses with but few exceptions have lost everything, and are nearly destitute by the fire, which is the most disastrous Muncie has ever known.

Among the buildings destroyed were Cunningham's grocery, Dr. Snell's office and residence, M. S. Mock's second-hand store, L. L. Wilcox' house, and several others.

Glue Factory Gutted.

CHICAGO, July 8.—Fire broke out at 2:36 o'clock Thursday morning in P. D. Armour's glue factory, located at Thirty-second street and the river. It started in the ice-house among a heap of shavings, and quickly spread to an adjoining apartment, where the glue starch was stored. This burned fiercely, and, before it could be got under control, gutted the entire building, except the ice-house. Loss, $30,000.

French Oil Factory Burned by Fire.

PARIS, July 8.—The oil factory of Marchand Freres, at Dunkerque, was entirely consumed by fire Wednesday; loss, $400,000. The destruction of the works throws 500 people out of employment.

Ice House Burned.

ALBANY, N. Y., July 8.—A house of the Knickerbocker Ice company, near this city, containing 20,000 tons of ice was burned, Wednesday night. Estimated loss, $100,000.

Fire in a Belgian University.

BRUSSELS, July 8.—A fire in the free university Wednesday destroyed the great hall and the whole of the right wing. A portion of the library was saved.

Distinguished Visitors to Gettysburg.

GETTYSBURG, Pa., July 8.—At the cavalry reunion Wednesday many distinguished military men of both the north and the south were present. Among the visitors were Gen. Wade Hampton, Gen. Mumford, Col. D. Lewis, Col. Blackford, Col. Baulden and Maj. McClellan, of the Confederate army, and Gens. Gregg, McIntosh, Trowbridge and Gray, and Capt. Gray, of the Union army. All of these were engaged in the battle twenty-three years ago. They rode over the field, agreed on localities and discussed the memorable events of the contests. Camp Hancock broke up Wednesday.

Disastrous Drought in Texas.

FORT WORTH, Tex., July 8.—The suffering from the long drought in western Texas is unprecedented, rain not having fallen in some localities for fourteen months. The cattle are starving. In many localities settlers are selling their farms for mere trifles and leaving for the east in abject poverty.

Advice to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP should always be used for children teething. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhœa. 25c. a bottle.

Women Engaged in Legal Practice.

The forty-eight women in actual practice before the courts in this country are distributed as follows: Iowa, 3; Missouri, 2; Michigan, 6; Utah territory, 1; District of Columbia, 3; Maine, 1; Ohio, 4; Illinois, 7; Wisconsin, 5; Indiana, 2; Kansas, 3; Minnesota, 1 (from Iowa); California, 3; Connecticut, 1; Massachusetts, 5; Nebraska, 1; Washington territory, 1; Pennsylvania, 1. The admission in all these states is to the highest courts, except in the case of Pennsylvania. Women have also appeared as attorneys in several of the local courts of Maryland, and have been admitted to United States courts in Texas and Oregon, though not to the state courts.—New Orleans Times-Democrat.

Sacred to the Boston Folks.

Sympathetic is believed to be a word sacred to the Bostonese. The other day a resident on the "Hill" was overheard ordering the family dinner at a stall in the Boylston market, and this is the way she did it: "You may send me spring lamb. Have you this spring's lamb? Very well, send that, and two bunches of asparagus and a can of 'petits pois.' They are so sympathetic with lamb."—Boston Herald.

Ben: Perley's Latest Joke.

Ben: Perley Poor's latest joke was to send a number of senators to a certain cigar store at Washington to see a "cherry-colored cat." The cat was the color of a black cherry.

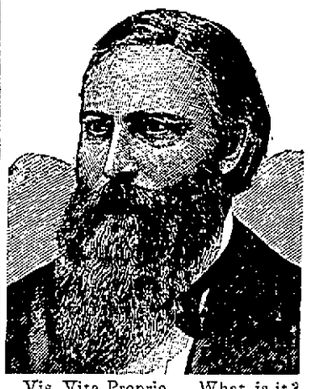
CLARKE & TUCKWOOD,

Opposite American Express office, West Milwaukee St.



Vis, Vita Propria. What is it? Scientists, Doctors, Lawyers and Ministers stand awe stricken and dumb-founded at the miraculous healing power possessed by Dr. Miner, whose portrait appears above.

Dr. Clark A. Miner, was born in Allen, Allegany Co., N. Y., in 1832, of English and Scotch parentage. Longevity is marked on all his ancestry. With nerves as sensitive as the magnetic needle and muscles as strong as steel, with a well balanced frame to support them, it is apparent that he is a proper subject to possess this magnetic power in excess of other men. It is charged against us that we get this wonderful power from an electric battery worn upon our body and arms. This is false. We receive this power from our creator. You ask, what is it? We answer we don't know any more what it is than you do. We are daily healing the sick. All functional disturbances are controlled like magic by the laying on of hands, no medicines. The lame throw away their crutches and walk; life's current again courses through the palsied and withered limbs; the bloom of health flushes the pallid cheeks that death marked as its own, by the magical touch of a man's hand.

Since the Savior of man healed the multitudes, nothing has equaled the wonderful and miraculous healing of this phenomenal man. It does not require weeks or months to prove to the afflicted that they will be benefitted, results are manifested at once We care nothing for the cause of your ailment. We treat conditions only and all functional abnormal conditions are controlled and permanently cured without medicines. Dr. Miner has leased Mrs. S. H. Shelton's residence for the summer where he can be consulted from 9 to 12 m, and 1 to 5 and 7 to 8 p. m. Will make calls outside of office hours: jun30-1m

ICE!

The Price of Ice for the Season of 1886

WILL BE AS FOLLOWS:

Ice to families for April, 1886.....	$ 1 00
25 lbs ice per day on the walk from May 1st to Oct. 1st, 1886	7 00
25 lbs washed and put in refrigerator.....	8 00
30 lbs on walk.....	9 50
30 lbs wash.....	11 00
40 lbs on walk.....	12 00
40 lbs washed.....	2 00
25 lbs per day by the month.....	3 00
Ice by the 100 lbs 20c by the ton..	
Ice for the month of Oct. 1886 if paid July 1st with the season..	1 00
If not ordered until Oct. 1886.....	1 50

Parties having ice washed and put in refrigerator must have the water ready or the ice will be left on the walk, as it takes half the men's time waiting for the water and adds to the expense of delivery. Hoping that customers will do their part, and promising to do mine, satisfaction will be guaranteed to both parties.

THE RED MAN'S RIGHTS.

A FEW THE PRESIDENT THINKS CONGRESS SHOULD RESPECT.

Veto of a Right-of-Way Bill—The House to Stand by the Pension Vetoes—Hammering the River and Harbor Bill Into Shape—The Case of Sturgeon Bay —Official Facts.

WASHINGTON CITY, July 8.—The president Wednesday sent to the senate without his approval the bill granting to railroads right-of-way through the Indian reservation in northern Montana. "The reservation referred to," the president says, "stretches across the extreme northern part of Montana territory, with British America for its northern boundary. It contains an area of over 30,000 square miles. It is dedicated to Indian occupancy by the treaty of October 17, 1855, and act of congress of April 15, 1874. No railroads are within immediate approach to its boundaries, and only one, as shown on recent maps, is under construction in the neighborhood leading in its direction. The surrounding country is sparsely settled, and I have been unable to ascertain that the necessities of commerce or any public exigencies demand this legislation, which would affect so seriously the rights and interests of the Indians occupying the reservation. The bill is in the nature of a general right-of-way for railroads through this Indian reservation. The Indian occupants have not given their consent to it, neither have they been consulted regarding it, nor is there any provision in it for securing their consent or agreement to the location or construction of railroads upon their lands. * * * If the United States must exercise its right of eminent domain over the Indian territories for the general welfare of the whole country, it should be done cautiously, with due regard to the interests of the Indians, and to no greater extent than the exigencies of the public service require."

The president then states that bills tending somewhat in the direction of this general character of legislation, affecting the rights of the Indians reserved to them by treaty stipulations, have been presented to him during the present session of congress, which have received his reluctant approval, though he is by no means certain that a mistake has not been made in passing such laws without providing for the consent to such grants by the Indian occupants, and otherwise more closely guarding their rights and interests, and he had hoped that each of such bills as he approved would be the last of the kind to be presented.

Pension vetoes was the topic of discussion in the house Wednesday, the Republicans severely criticising them and the Democrats demanding that they be given respectful consideration. In the course of the discussion Browne of Indiana said the president would go down to posterity as the great American objector, and Cannon of Illinois that the president stood looking through a gimlet hole with a magnifying glass hunting for excuses, and heaping derision on the heads of poor men who lost their health in the service of their country. That was statesmanship. Cannon warned the Democrats that they would have to defend the president's course before November, and predicted that the people would send a congress here that would pass these bills over the vetoes.

Matson of Indiana said that many members forget that nearly all of these bills had been vetoed by a Republican commissioner of pensions years ago.

The Democrats carried their point until filibustering was begun. The votes followed party lines each time, and the effort to get a bill up for consideration failed each time. The action of the Democrats indicates clearly that the party intends to stand by the president, and that there is no chance to pass any of the bills over his veto.

THE SENATE DOES BUSINESS.

And the House Wrangles Over the President's Pension Vetoes.

WASHINGTON CITY, July 8.—A petition was received by the senate Wednesday from J. S. Kirkpatrick, whose pension bill was vetoed by the president, praying the passage of the bill over the veto. After deciding to meet hereafter at 11 a. m., consideration of the river and harbor bill was continued. A substitute to the amendment appropriating $150,000 for Sturgeon Bay canal was agreed to. It appropriates the money for the purpose of making the canal free of toll. An amendment increasing from $60,000 to $75,000, the sum set apart for Duluth harbor, was adopted, and a number of amendments reducing appropriations were rejected. The amendment reducing the amount for Mussel shoals, Tennessee river, to $250,000, was agreed to, and the amendment reducing the appropriation for the Kentucky river to $100,000 from $250,000 debated without action. Majority and minority reports on the La Arba claims were received, and an executive message vetoing the bill granting the railway right-of-way through Indian lands in northern Montana read, and the senate adjourned.

The twenty-one veto message already noted in these dispatches, were laid before the house, and immediately brought on a struggle, Republicans desiring a vote and Democrats wishing the vetoes referred. Several were referred, when the Republicans resorted to dilatory tactics, upon debate being shut off, by the call for the previous question, and calls of the house took up the time until the adjournment hour.

THE LA ABRA CLAIMS.

What Senate Committeemen Say About an Old Question.

WASHINGTON CITY, July 8.—Senator Edmunds Wednesday on behalf of Senator Morgan, reported back from the committee on foreign relations the bill providing for the determination of the controversy of the La Abra Mexican claim in the supreme court of the district of Columbia. The report says the country will not be satisfied that its honor has been vindicated by the mere rejection of the convention, when the vote of the senate does not clear up or explain the strong array of facts which tend to show that the demand against Mexico is unjust and has no substantial foundation. Senator Brown, in a minority report adverse to the bill, comments upon the devotion of the United States to arbitration instead of war as a mode of settling differences with other nations. He says: If the international judgment is, under all the conditions surrounding it, to be trampled down as now proposed, it would be difficult to describe in adequate terms the magnitude of the disaster which the act will have inflicted upon the country and the peace of the world.

The Sturgeon Bay Canal.

WASHINGTON CITY, July 8.—The history of the Sturgeon Bay & Lake Michigan ship canal, for the purchase of which the senate has agreed to an appropriation of $150,000, is stated to be as follows: The government granted the state of Wisconsin 500,000 acres of land, for which purpose the state was to build a canal and harbor of refuge. The state of Wisconsin granted the land to a company. This company built the canal, which is about two miles long, after the Federal government had built a harbor of refuge, which, by the grant, the state of Wisconsin was to build. Now, after the government has given the state of Wisconsin this land and the harbor of refuge, the senate amendment proposes to buy the canal at $150,000.

Looking After the Cash.

WASHINGTON CITY, July 8.—In order to prevent the occurrence of shortages in the accounts of officers receiving or disbursing public money, Secretary Lamar Wednesday issued an order which he directs to be immediately and peremptorily enforced, requiring every such officer or employe of the interior department to make weekly cash reports, showing what had been received and what had been expended and what remained on hand. It is intended to send these reports to the treasury department, where they may be compared with reports received from the depositories where public money is placed.

An Ugly Customer for Rioters.

WASHINGTON CITY, July 8.—Dr. Gatling, the inventor of the famous Gatling gun, is in the city. He will soon have ready a new form of his machine gun specially devised for use by the police in our great cities. The barrels of the gun are only twelve inches long, and the whole thing, when mounted on a police wagon, will not weigh more than fifty pounds. His idea is to have two or three of these guns mounted on a police wagon which can be driven rapidly to the scene of a threatening riot. Each gun will fire at least 1,600 shots a minute.

Amending Whisky Legislation.

WASHINGTON CITY, July 8.—The senate committee on finance will, as soon as a report on the subject can be prepared, propose several amendments to the fractional whisky bill already on the senate calendar. This will embody substantially the legislation asked for by the Viticultural association with the exception of the provisions relating to the adulteration of wines. They will confer the privilege of fortifying sweet wines with grape brandy free of tax: of fortifying wines for export when alongside the outgoing vessel and warehousing for three years all kinds of fruit brandies.

WASN'T DRIVEN FROM CANSO.

An American Captain Gives His Experience in Canadian Waters.

GLOUCESTER, Mass, July 8.—The schooner Annie M. Jordan arrived from Grand Banks Wednesday morning. She is the vessel reported as being driven from Canso by the Canadian cruiser Howlett. Capt. Haynes says the story circulated is false. Capt. Lorway came on board and gave him copies of the treaty regulations and customs laws. He had been lying in the harbor for twenty-four hours, as the wind was ahead. Capt. Lorway said he might remain in the harbor, and that outside three miles from any land, he had no jurisdiction. Capt. Haynes could buy all the bait he needed outside that limit.

Capt. Haynes says Collector Young instructed him in regard to his permit to touch and trade, that it was only good for vessels trading from one foreign port to another. If he recognized it at the custom house, to enter or clear a vessel, it would shut him out from going into any other harbor in the Dominion to trade. The customs laws, he says, are being strictly enforced. Crews can not go on shore or take water, until the master reports at the custom house, but he was treated well by Capt. Lorway and Collector Young.

After Another Schooner.

SHELBURNE, N. S., July 8.—The captain of the Dominion cruiser Terror is indignant because the American schooner Craig, after being allowed to land a sick man, shipped a sailor and put to sea. He says he will take the Craig whenever he can catch her.

INDIAN OUTBREAK PROBABLE.

British American Redskins Threatening Revolt—A Chief Arrested.

OTTAWA, Ont., July 8.—The arrest of Chief Breaking-through-the-Ice, has caused much commotion among the Indians in the neighborhood of Edmonton. Several consultations have taken place between these and the chiefs of the Crees, Chippewas and Bobtails. A petition asking redress will soon be forwarded by them to Sir John McDonald. Better provision and clothing are demanded or else they will revolt.

The news of Poundmaker's death caused a sensation among them Monday, and the death dance was performed with all its horrible attributes. About 400 braves with war paint took part. They have gotten hold of a report which fully confirmed that Poundmaker died of starvation, caused by neglect on the part of the whites, and are furious in consequence.

The mounted police force will be recruited by volunteers at once, and over 100 men will be sent to strengthen the forces at Fort McLeod, Calgarry and Edmonton.

Death of Hayne, the Southern Poet.

MACON, Ga., July 8.—Paul Hamilton Hayne, the poet, died about 8 o'clock Wednesday evening at his home, Copse Hill. He had been suffering for some time from the effects of a paralytic stroke. The news of his death was received here with every evidence of regret on the part of the people. Mr. Hayne was born at Charleston, S. C., on Jan. 1, 1831. He was a son of Lieut. Hayne, of the United States navy, and a nephew of Robert Y. Hayne, governor of South Carolina and United States senator from that state. The Hayne family has been prolific of men whom the southern people have delighted to honor, and none of them have held a higher place in their esteem than the genial poet who has just passed away.

A Victim of Speculation.

NEW YORK, July 8.—It is learned that John Werner, who shot and killed his son Joseph and himself in this city Wednesday morning, was some years ago a successful tailor, doing business at Twenty-third street and Fourth avenue. After making a comfortable fortune he unluckily tried his hand at speculating in stocks, and lost all his money. Other misfortunes befel him, and he has never been able to retrieve his condition or get his son started in life. It is supposed that despondency from these causes led to his crime.

A Mischance at the Gas Works.

SARATOGA, N. Y., July 8.—Owing to some mischance at the gas works, Wednesday night, all the gas was cut off from the city and the lights in the big hotels suddenly went out. The guests who had retired had to be awakened and cautioned to turn off any jets that might have been left turned on. In this way any possibly serious consequences were averted, but the failure of illumination caused much inconvenience.

Lake Shore Strikers Deny a Report.

CHICAGO, July 8.—The striking switchmen of the Lake Shore railway positively deny the statement that any of their men have applied to be reinstated on the road. All their men, they say, were present at the meeting, Tuesday night, and all firm in the determination to stand out.

An Alleged Embezzlement.

PITTSBURG, Pa., July 8.—A sensation struck the court house Wednesday in the shape of papers filed by John T. Gordon, president of the Pittsburg, Oakland & East Liberty Street railway against D. W. C. Bidwell, late treasurer of that road, to recover $22,5000, alleged to have been embezzled by Mr. Bidwell, while treasurer of the road.

Brighton Beach Races.

NEW YORK, July 8.—At Brighton Beach course Wednesday the winning horses were: Dizzy Brunette ¾ mile, Lutestring ¾ mile, Broughton ⅞ mile, Al Reed ¾ mile, Leonora 1 mile, Gold Bar 1 mile, Nettie 1⅛ miles, Ben Pryor 1½ miles.

A Captain's Fortunate Discovery.

Capt. Coleman, schr. Weymouth, plying between Atlantic City and N. Y., had been troubled with a cough so that he was unable to sleep, and was induced to try Dr. King's New Discovery for Consumption. It not only gave him instant relief, but allayed the extreme soreness in his breast. His children were similarly affected, and a single dose had the same happy effect. Dr. King's New Discovery is now the standard remedy in the Coleman household and on board the schooner. Free Trial Bottles of this Standard Remedy at F. Sherer & Co's Drug Store.

Scott's Emulsion of Pure

COD LIVER OIL, WITH HYPOPHOSPHITES

As a Remedy for Pulmonary Affections and Scrofulous Diseases.

Dr. Ira M. Laug, a prominent physician in New York, says: I am greatly pleased with your Emulsion. Have found it very serviceable in above diseases, and it is easily administered on account of its palatableness.

are attended by an inflamed condition of the lining membrane of the nostrils, tear ducts and throat, affecting the lungs. An acrid mucus is secreted, the discharge is accompanied with a burning sensation. There are severe spasms of sneezing, frequent attacks of headache, watery and inflamed eyes. Ely's Cream Balm is a remedy that can be depended upon. 50 cents at druggists; by mail, registered, 60 cents. Ely Brothers, druggists, Owego, N. Y.

FIGHTING THE BOYCOTT PLAN.

Suit Ordered Against a New York Paper —Mrs. Landgraff's Persecutors.

NEW YORK, July 8.—In the trial of the seventeen Bohemian boycotters of the bakeress Mrs. Landgraff, the greater part of Wednesday was spent in obtaining a jury. Several of the panel told Judge Barrett that they feared that their families would suffer from the malice of the Anarchists in case they should serve on the jury and find it necessary to bring in a verdict against the accused. Judge Barrett finally directed the district attorney to at once bring an action against The Volks Zeitung for urging that a boycott and other intimidations be practiced against the jurors who convicted the Theiss boycotters. The district attorney promised to act accordingly.

Assistant District Attorney Fellows, in opening the case for the people, pointed out that the boycotters in this instance could not claim to be fighting against the oppressions of capital. The widow Landgraff was a poor woman trying by honest work to support her large family.

Mrs. Landgraff then took the stand and testified, through an interpreter, in the Bohemian language. She said that since her husband died she had worked up a trade that was worth from $300 to $400 a year after paying all expenses. After the boycott she did hardly any business at all. She identified several of the accused as having called on her and ordered her to discharge non-union bakers. The court then adjourned for the day.

Batting the Batteries.

Runs round the diamond Wednesday were scored as follows—National league: At Chicago—New York 9, Chicago 2—game called at eighth inning at request of captain of the New York club; At Detroit—Philadelphia 0, Detroit 2. American association: At Cincinnati—Metropolitan 4, Cincinnati 5; at Louisville—Athletic 3, Louisville 8; at Pittsburg—Allegheny 6, Brooklyn 2; at St. Louis—Baltimore 0, St. Louis 6.

Clay Pigeon Shooting Record Broken.

NASHVILLE, Tenn., July 8.—The clay pigeon match, Wednesday, between Captain Andy Meaders, of Nashville, and Captain A. H. Penrose, of San Angelo, Tex., for $250 a side, was won by Penrose. The score was 95 to 93 out of a possible 100 birds. This breaks the record in clay pigeon matches.

The Iron Outlook Encouraging.

PITTSBURG, Pa., July 8.—The new iron workers' scale has been signed by all the rolling-mill proprietors in the Mahoning valley except the Mahoning Valley Iron company, and it is thought that that company will soon yield. The prospects for the iron industry are better now than for four years.

Sullivan Looking for a Safe Spot.

BRIDGEPORT, Conn., 8.—John L. Sullivan is in town, the guest of Pete McCoy. It is said that Sullivan is here to look over the ground with a view to selecting a place to meet some one of the many pugilists anxious to stand up before him for four rounds.

Referred to the Supreme Court.

ST. LOUIS, July 8.—Judge Van Waggoner Wednesday refused a new trial in the case of Brooks, Preller's murderer, saying the defense could now take the points, which were important, to the supreme court.

That Chicago Jury.

CHICAGO, July 8.—None of the talesmen examined in the Anarchist trial Wednesday proved acceptable, and the jury still lacks five of the requisite numbe

CONDENSED NEWS.

Watkins F. Nisbet, a leading citizen of Evansville, Indiana, died Wednesday evening.

James Duncan, a noted horseman of Normal, Ills., recently became insane in France, and on reaching home was ordered to an asylum.

A justice in Cincinnati exacted bonds of $1,000 each from seven journeymen bakers who have been boycotting Charles Binnie. The charge was attempt to blackmail.

In a saloon at Batavia, New York, on Tuesday evening, August Scharf killed William Enright with a musket loaded only with a wad of paper, making a hole in his back two inches in circumference.

William M. Jones, of Des Moines, has brought suit in the federal court at Chicago to compel John B. Alley, of Boston, to refund $160,000 or more acquired through manipulation of the Des Moines & Minneapolis road.

Dr. G. C. McFarland, of the insane asylum at Jacksonville, Ills., states that in the asylums at Elgin and Kankakee are over 600 wealthy insane patients, and that the only unfortunates sent back to the counties are paupers. An investigation of the matter will be ordered by the commissioners of Cook county.

THE MARKETS.

MISCELLANEOUS.

WOMEN

Needing renewed strength, or who suffer from infirmities peculiar to their sex, should try

BROWN'S IRON BITTERS

QUALITY P PURITY NOT QUANTITY. Trade Mark. On Every Bottle.

THE BEST TONIC

This medicine combines Iron with pure vegetable tonics, and is invaluable for Diseases peculiar to Women, and all who lead sedentary lives. It Enriches and Purifies the Blood, Stimulates the Appetite, Strengthens the Muscles and Nerves—in fact, thoroughly Invigorates.

Clears the complexion, and makes the skin smooth. It does not blacken the teeth, cause headache, or produce constipation—*all other Iron medicines do.*

Mrs. Elizabeth Baird, 74 Farwell Ave., Milwaukee, Wis., says, under date of Dec. 26th, 1884:
"I have used Brown's Iron Bitters, and it has been more than a doctor to me, having cured me of the weakness ladies have in life. Also cured me of Liver Complaint, and now my complexion is clear and good. Has been beneficial to my children."

Genuine has above trade mark and crossed red lines on wrapper. Take no other. Made only by BROWN CHEMICAL CO., BALTIMORE, MD.

Ladies' Hand Book—useful and attractive, containing list of prizes for recipes, information about coins, etc., given away by all dealers in medicine, or mailed to any address on receipt of

Our productions are the Perfection of Shoe-making.

In them Every Objection to ready-made shoes is removed. The success at once attained by our goods wherever introduced is because they are glove-fitting, elegant in style and finish, of the finest materials and workmanship, and moderate in price. The horrors of breaking-in are avoided: they are comfortable from the very first. Made in all sizes, widths and shapes.

T. T. CROFT Agent,
A. V. H. CARPENTER, Gen. Pass. Agt.

Shopiere.

—Mrs. Davis, of Murfusboro, Ill., is visiting with her brother and family, in this village.

—Mr. Edward Cook, of Chicago, preached in the M. E. church last Sunday evening. Mr. Cook will be remembered by many as an old resident here many years ago.

—The pic nic held in Mr. Artemus Smith's grove last Saturday was much enjoyed by those present. The music rendered by Prof. Sherman on the violin, was pronounced by those who are judges, as fine. Prof. Sherman is a young man of large musical abilities, and has a wide future before him in the musical line.

—Edward Dawson, of Belle Plain, Ia., is a guest at the home of A. E. Sears. Mr. D. holds a position in the machine shops of the C. & N. W. Ry. at that place.

—A large company of young people spent the day at Geneva lake.

—Ed Buck and Mace Holmes are out from Chicago to get the fresh air of their country homes.

—Mrs. Atwood, of Beloit, spent the Sabbath with A. H. Manley's family.

—At the annual school meeting held Monday evening D. H. Smith was re-elected director, which is his fifth term as a school officer in our district. Mr. Smith has always been in favor of a first class school and it is due largely to his faithful labors that our public school is such a success. The district voted not to have a third department the coming year but will make many improvements about the building.

—Representatives of the Salvation Army from Janesville were here last Saturday in attendance at a picnic held by Mrs. Alonzo Allen and many others in Mr. Shults grove. They held one of their prayer and social meetings, which attracted a large number of people present. Those who were present expressed themselves very much pleased with the exercises and the captain and cadet who were present left a very favorable impression among our people. They were entertained by Mrs. Allen at her home.

—Mr. Peter Fonda, Sr., received notice from the postoffice department that the mail route would be given to him as his bid was the lowest, $17.50 per year. But it turns out that this bid was intended by him to be by the quarter, or at the rate of $70 per year. So the old mail agent will have a few days longer to fill his fat pocket-book from the "spoils of the office."

—Mr. David Billings and family, of Janesville, with friends from Michigan, spent 3d July with A. A. Allen's family and were among the picnic company at Shult's grove.

—Prof. Geo. E. Fellows, who arrived from New Orleans last week, has been spending a few days among his many friends in this community and has now gone to Madison to attend the State Teachers' association, which is being held there this week. Prof. Fellows gives a very interesting account of his experience as a resident in New Orleans. He intends returning to his labors there in the fall.

Fairfield.

—E. F. Welch and wife are visiting friends in Minnesota.

—The hay crop is being secured in fine condition.

—Robert Moore has the boss field of corn.

—A country store is usually voted a nuisance as being the rendezvous of the loafing portion of humanity for smoking, gossip and general rowdyism. But we are glad to one in our village to be an exception to this rule; for in traveling to and fro, up and down the earth we find none kept in a more tidy and inviting condition. Mr. Sarl is entitled to much credit for the way he has fitted up his store and it is a pleasure to go there to trade.

—Died.—Mrs. Polly Smith, wife of Mr. Ezra Smith, passed away at her home in Bradford, June 30, in her 78th year. Mrs. Smith has been in poor health for several years, and for the last two months it has been quite evident that her life would not long be spared. She was an old resident of this town, having settled here in 1841, and was much respected in the community where she had so long lived. She leaves an aged companion and two sons, Israel W. and Marion Smith of this town and a daughter, Mrs. Mary Ann Chamberlain, of Iowa, to mourn the loss of an affectionate wife and mother. She had been a member of the Baptist church at Clinton for the past twenty-six years, and the funeral services were conducted by Rev. Mr. Smith, of that place, who gave a very thoughtful and instructive discourse on the occasion, which was held at the church at Bradford Center, on Friday afternoon. A quartette from Clinton rendered an appropriate song service, after which the remains were taken to the cemetery at Fairfield, for interment. The pall bearers were Messrs. Elijah and Edward Iams, John Smith, William Dathie, John Johnson and Beesecker.

Bucklen's Arnica Salve.

The best salve in the world for cuts bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. —SUBSCRIBE FOR THE DAILY GAZETTE 12 CENTS A WEEK DELIVERED TO ANY PART OF THE CITY.

Clinton.

—Rev. G. A. Hubbs delivered his lecture on New Mexico, in the M. E. church Sunday evening. His old friends were surprised and much pained to learn that his health is so poor and that he is so deaf he cannot hear a word spoken.

—Rev. H. A. Smith, late pastor of the Baptist church in our village has recently returned from California and spends a few days in Clinton. He preached in his old pulpit Sunday morning and evening.

—Mr. George W. Irish and Mrs. Fassett were made man and wife Tuesday, June 29th. Rev. H. A. Smith tied the knot.

—Mr. and Mrs. R. W. Cheever were at Burlington over Sunday visiting Dr. Crandall and family.

—There will be a gospel temperance meeting at the town hall next Sunday at 3 p. m.

—Mrs. Irene Benson is home from Buffalo looking healthy and happy.

—People are very busy improving the time this fine hay weather. The crop will be much better in quality and yield than last season in our town.

—Early planted corn on good land and well tilled is showing a remarkable growth for this season of the year. We see some fields where tassels begin to show and the leaves stretch up 6½ feet tall.

—The surface of the earth is getting dry and showers would do much good.

—About four o'clock Monday afternoon the cry of fire and ringing of church bells brought a multitude of our citizens, men and women to the residence of A. S. Isham, a house owned by Rube Owen which proved to be on fire in the east gable of the upright. Sharp, quick work with ladders and pails of water soon extinguished a fire well under way towards a disastrous conflagration, as other wooden structures were near and in the direction the wind was blowing with considerable force. As there had been no fire in that part of the house in some weeks it is supposed that the expiring embers of a 4th of July firecracker done the business.

—Some of our citizens more patriotic than pious were celebrating the 4th, Sunday evening.

—Miss Phebe Bailey arrived home Friday morning from an extended visit in Minnesota.

—At the annual meeting of the Clinton graded school held July 5th, B. B. Olds was re-elected director for 3 years $1225 was raised for teachers wages and incidentals. $3,612 passed into the hands of the district treasurer during the year.

Evansville.

—The Juvenile Temperance society held its monthly meeting at the M. E. church last Sunday and observed the Fourth by singing patriotic songs.

—If the dry weather continues a few days longer the tobacco crop will be very small in acreage this year.

—The burning of the railway company's engine house at the depot last Friday afternoon created quite an excitement and had the fire company been much slower in getting to work the larger portion of our town would have been in ashes. It took twenty minutes for the fire company to get the engine out of the house and get up steam ready for throwing water.

—Harry Sewell, Will Campbell and Robert Antics each took their fast horses over to Stoughton on the 3d, and entered them in the races. Sewell took first money; time, 2:48. Campbell and Antics each took third place in their races. Antics and Campbell were pocketed in their races by the other drivers all working against them, and the same game was tried on Sewell, but he and his horse were too smart for them.

—Rev. E. L. Eaton will lecture on temperance in Magee's hall next Thursday evening.

—We hear that Delos Williams has got into trouble again, and that he is stopping with Col. Hanthorn.

—The 4th passed very quietly in this place, also the 3d and 5th. The streets appeared as though it was Sunday.

—The village board is having several large cisterns put in around town.

—At the meeting of the village board a few evenings ago the question of granting the druggists licenses was brought up and was referred to the license committee, and there appears to be a question whether they will be granted or not.

—John Needham, of Magnolia, got very tired Monday afternoon while in town and Marshal Ballard gave him a resting place in the cooler, until Tuesday morning.

—Ed Williams has returned from Washington.

—Joint high school district No. 6 met at Magee's hall Monday evening and adjourned to meet at the same place on Friday evening.

If you would enjoy your dinner and are prevented by Dyspepsia, use Acker's Dyspepsia Tablets. They are a positive cure for Dyspepsia, Indigestion, Flatulency and Constipation. We guarantee them. 25 and 50 cents. Prentice & Evenson, druggists, O. P. O.

MADE SOME PROGRESS.

The Knights of Labor Increase the Executive Board—As to Organizers.

CLEVELAND, Ohio, May, 28.—Rumors abroad Thursday night to the effect that Powderly had presented his plan for the future government of the Knights of Labor in Thursday's session of the convention led that gentleman Friday morning to declare emphatically that such was not the case. "Only Turner and few friends who, I am certain, have not spoken publicly of it, know what are my plans. Many delegates favor the the compulsory formation of state assemblies, having the power to institute strikes and boycotts, which is now vested in the local and district assemblies, the decision of the state assembly to be sustained by the order in general. According to the constitution, as it stands now, the order in any state may form a state assembly consisting of delegates from each district assembly. In Michigan and two or three other states such assemblies are now in vogue, but they have not the power to act that it is proposed they should have. In Michigan the state assembly has acted in a number of serious difficulties and the knights of that state have engaged in fewer strikes than those of any other state in the Union.

The committee on laws resubmitted to the Knights of Labor convention Friday morning the petition to increase the executive board by the addition of six members, which after evoking a long debate Thursday had been recommitted to the committee. The proposition was agreed to. Six new members will be elected by the ballot of the convention, and will serve until the annual convention next October, when the regular election occurs. It was then moved and carried that the grand master workman be authorized to revoke all outstanding commissions of organizers. In the future much greater care will be exercised in the appointment of organizers, and each candidate will have to demonstrate his competency by passing a set of civil service examinations. The executive board was authorized to open a permanent headquarters in Philadelphia.

Incorporation of Trades Unions.

WASHINGTON, CITY, May 28.—The house committee on labor has agreed upon a favorable report on the bill to incorporate trades unions in the District of Columbia and the territories.

Nomination of a Michigan Man.

WASHINGTON CITY, May 28.—The president Friday sent to the senate the nomination of William H. Cleveland, of Michigan, to be appraiser, district of Detroit, Mich.

Don't trifle with any Throat or Lung Disease. If you have a Cough or Cold, or the children are threatened with Croup or Whooping Cough, use Acker's English Remedy and prevent further trouble. It is a positive cure, and we guarantee it. Price 10 and 50c. Prentice & Evenson, druggists, O P O.

Literature and English Lords.

It is the fashion to say that in these day the barriers of rank are broken down, that literary reputation is a social passport, and genius opens all doors; that the aristocracy itself has entered the lists, and recognized the equality of poets and philosophers with its highest members. But nothing can be more fallacious than this opinion. The lords open their doors to men and women of parts, it is true, but the purpose is to amuse themselves, not to do honor to literature. In old times they had their jesters and their bards to while away the time or to chronicle their deeds. Froissart and Ben Jonson were little more in their eyes. So the queen still keeps a poet laureate to celebrate the births and marriages of her progeny; and duchesses have authors and actors at their parties to entertain their guests, as they have music and ice cream.

The geniuses would like to believe, because they are sometimes invited to dinner, or even to a country house, that the feeling of the aristocracy is changed; but let one of them ask to marry the daughter of a duke, and he will discover how wide is the gulf that separates them. Let him presume in any way too far upon the notice that he thinks is a friendship, and he will be dropped with as little ceremony as if his lordship were dismissing a footman. The people of letters are admitted or invited to-day and forgotten or ignored to-morrow. They may be in society for a while, they are never of it; and if they no longer wait in the ante-room, as Johnson did at Chesterfield house, they must make themselves either serviceable or agreeable if they expect to stay up-stairs. They know this very well, though they don't always tell it, and the more dignified keep aloof from the great world.—Adam Badeau's Letter.

The reason why Acker's Blood Elixir is warranted, is because it is the best Blood Preparation known. It will positively cure all Blood Diseases, purifies the whole system, and thoroughly builds up the constitution. Remember, we guarantee it.

A Little Sufferer,

CLEANSED, PURIFIED AND BEAUTIFIED BY THE CUTICURA REMEDIES.

It affords me pleasure to give you this report of the cure of our little grandchild by your Cuticura Remedies. When six months old his left hand began to swell and had every appearance of a large boil. We poulticed it, but all to no purpose. About five months after it became a running sore. Soon other sores formed. He then had two of them on each hand and as his blood became more and more impure, it took less time for them to break out. A sore came on the chin beneath the under lip, which was very offensive. His head was one solid scab, discharging a great deal. This was his condition at twenty-two months old, when I undertook the care of him, his mother having died when he was a little more than a year old, of consumption (scrofula of course). He could walk a little, but could not get up if he fell down, and could not move when in bed, having no use of his hands. I immediately commenced with the Cuticura Remedies, using the Cuticura and Cuticura Soap freely, and when he had taken one bottle of the Cuticura Resolvent, his head was completely cured, and he was improved in every way. We were very much encouraged and continued the use of the remedies for a year and a half. One sore after another healed, a bony matter forming in each one of these five deep ones just before healing, which would finally grow lose and were taken out; than they would heal rapidly. One of these ugly bone formations I preserved. After taking a dozen and a half bottles he was completely cured, and is now, at the age of six years, a strong and healthy child. The scars on his hands must always remain; his hands are strong, though we once feared that he would never be able to use them. All that physicians did for him did him no good. All who saw the child before using the Cuticura Remedies and see the child now consider it a wonderful cure. If the above facts are of any use to you, you are at liberty to use them.

MRS. E. S. DRIGGS.

May 9, 1885. 612 E. Clay St. Bloomington, Ill.

The child was really in a worse condition than he appeared to his grandmother, who being with him every day, became accustomed to the disease.

MAGGIE HOPPING

Cuticura Remedies are sold everywhere. Cuticura, the great skin cure, 50 cts.; Cuticura Soap, an exquisite skin beautifier, 25 cts.; Cuticura Resolvent, the new blood purifier, $1.00. Prepared by the Potter Drug and Chemical Co., Boston.

Send for "How to Cure Skin Diseases."

ITCHING, Scaly, Pimply, and Oily Skin beautified by Cuticura Soap.

Catharral Dangers.

To be freed from the dangers of suffocation while lying down; to breathe freely, sleep soundly and undisturbed, to rise refreshed, head clear, brain active and free from pain or ache; to know that no poisonous, putrid matter defiles the breath and rots away the delicate machinery of smell, taste and hearing; to feel that the system does not, through its veins and arteries, suck up the poison that is sure to undermine and destroy, is indeed a blessing beyond all other human enjoyments. To purchase immunity from such a fate should be the object of all afflicted. But those who have tried many remedies and physicians despair of relief or cure.

Sanford's Radical Cure meets every phase of Catarrh, from a simple head cold to the most loathsome and destructive stages. It is local and constitutional. Instant in relieving, permanent in curing, safe, economical and never-failing.

Sanford's Radical cure consists of one bottle of the Radical Cure, one box of Catharral Solvent, and one Improved Inhaler, all wrapped in one package, with treatise and directions, and sold by all druggists for $1.00.

Potter Drug & Chemical Co., Boston.

Use Buckle shields and save your horse's tail. For sale at Jas. A. Fathers.

Pat Gibbons, of Sharon, continues to run the old 'bus line from Sharon to Geneva Lake.

Brieflets.

—Military drill night.

—Minstrels at Lappin's hall this evening.

—The case of Drake against Wedge is still on trial in the circuit court although it will probably be finished this afternoon.

—The horse for the patrol wagon is now at Fredericks' livery stable, and the wagon will probably be ready for use in about ten days.

—Janesville Commandery No. 2, Knights Templar, assemble in regular semi-monthly conclave this evening at Masonic hall.

—The cases of Thomas Riley and Frank Hennessey which were to come up before Judge Patten to-day were adjourned one week.

—A double track or turnout is being laid by the street car company on Academy street, between Wall street and the railroad crossing.

—The funeral of Orion Withington will be held to-morrow afternoon at two o'clock from the residence of his parents Mr. and Mrs. Charles B. Withington, fourth ward.

—The electric light at the Academy street railway crossing is now in place, and a light has been put in at the store occupied by F. S. Lawrence and G. Cogswell.

—Two old men in the fifth ward had a dispute last evening that ended in blows. Daniel Lynch had rather the worst of it and this morning he swore out a warrant for the arrest of the other, whose name is Hurst.

—Mr. R. A. Horn, the Main street jeweler, has had consigned to him a very choice line of solid gold pins, ear rings and studs with rhine stone settings, which he proposes to sell at cost. Call and see them.

—The Woman's Mission Circle of the Baptist church will meet in the church on Friday afternoon at 3 o'clock. All holding "mite boxes" are requested to bring them in, leave the contents and keep the boxes for future use.

—The pasto brigade of the great Barnum show are putting up some very attractive paper in this vicinity. "Jumbo" is the drawing card and many of the illustrations are descriptive of the accident in which that monster lost his life.

—G. W. Tyler, the genial engineer at the Williamson, Crane & Co. soap factory, is happy over the advent of an eleven pound boy who arrived at 10 o'clock this morning, and we hope he has come to stay. George has been around with cigars and says all are doing well.

—Farmers along the line of the railroads near here have been kept busy lately looking out for fire in the dry grass. Sparks from passing engines have caused quite a number of blazes within a short time past and some lively fire-fighting has been done.

—William Cannon, a well-known farmer living in the town of Harmony, died last evening, aged about sixty-five years. He had many friends in this vicinity who will mourn his death and will sympathize with the bereaved family. Funeral services will be held to-morrow afternoon at the residence, and afterwards at the Harmony town hall.

—Janesville will be quite well represented at the Chicago-Detroit ball game to-day. We take the earliest opportunity of saying to the young man who bets upon these games with the reckless abandon of youth, that the walking from Chicago to this city is fairly respectable during the dry weather; but the distance is characterized by a disagreeable continuity.

—Muscular christianity was forcibly illustrated last night by a recent convert of the Salvation Army. He became tired of listening to the remarks made by a number of hoodlums as the army was going home; and had it not been for the interference of bystanders, would have polished off one of the crowd in the most approved style.

—The funeral services of the late Mrs. Mary Whalen took place this morning at St. Patrick's church. There was a large attendance of friends and relatives and at the conclusion of the Rev. Father Spillard's remarks the remains were followed to their last resting place by a large number of those who had learned to esteem highly the one who now lays cold in death.

—The Chicago Journal:—The drouth for the past four weeks has been severe through parts of Illinois, Wisconsin and Iowa. During this period rains in the belt of country thus described have been rare and amount to no more than short local showers, insufficient to saturate the soil. The small grains throughout these sections are a failure; pastures are drying up, and the agricultural losses will be considerable.

—From all appearances a public art gallery would be a paying institution in this city. The love of art is so strong among Janesville people that notwithstanding the hot sun, each bill board, where the performers in the "greatest show on earth" were represented, the men in pink and blue tights and those of the gentler sex in dresses very *decollete* at both ends, was surrounded by a crowd most of the day. The residents of the Bower City possess much artistic taste.

—The Oshkosh Northwestern, describing the condition of parts of the country north of that city, where not a drop of rain has fallen in ten weeks, says: "Pastures are eaten off to the roots of the grass, and the dried earth is as brown as wrapping paper Many fields of oats will never be cut, and smut has attacked the withered wheat. The hay crop is a failure, and cattle are turned into the highways to find a living. Without rain very soon, and the prospects for it are very slim, there will be no harvest worth mentioning in many localities in this section. The outlook in this vicinity is indeed distressing.

—A Beloit dispatch to this morning's Milwaukee Sentinel says: A bad drouth has prevailed in this locality until the condition of the crops has grown desperate, and in some places little can be saved unless there is rain soon. The oats are almost ruined, barley the same; corn is at a standstill, and the grass has almost burned up. For a territory of several miles west of Beloit there have been frequent rains up to within ten days, so the complaint is not as general as from other sections. Some farmers are mowing their oats to save them for fodder, as they will not develop. There has been considerable hay secured, but much of it has been spoiled. The tobacco crop in this locality will amount to little, as the plants have not started growing.

—The tallest residence in the world is now in litigation. It is the Osborne apartment house, New York, and it measures 200 feet from sidewalk level to roof. Like most of the enormous French flat buildings, it has been a financial failure, returning less than 2 per cent on the investment of a million and a quarter. The law suit is over a contract under which it was to have been sold by Thomas Osborne to the wife of Gen. Charles O. Dodge. The lofty structure stands on an elevated site in Seventh avenue near Central park, and it makes the neighboring church spires look mean and small. As a new law forbids the erection of houses in New York more than 100 feet high, and as similar restrictions are in force in European cities the Osborne is likely to retain its altitudinous preeminence.

—Coup & Hadfield's Equescurriculum of trained horses, ponies, mules, goats, dogs, etc., will appear in this city under canvas on Monday, Tuesday and Wednesday next, and the performance given will be identical with those given during the past six weeks in Chicago and which have elicited unbounded encomiums from the press. The Broncho horses which form the principal feature of the show, were taken in a perfectly wild state from their home on the plains of Oregon, but last October, in that short time their sagacity and instinct has been docilified to such an extent that they cannot fail to astonish all beholders. Mr. W. C. Coup the manager, will be favorably remembered as the manager, organizer and part owner of the great Barnum shows, and in his new venture in the Equescurriculm he is fast achieving a success as great as when he pushed P. T. B. to the front and thus capped the climax of the old showman's fortune.

REMOVING THE ROOF.

What is Being Done at the Myers Opera House.

The stream of plaster and scraps of lath that has poured out of the upper window of the Myers opera house lately has made it evident that work upon the enlargement of the house had been commenced and many questions have been asked as to how it was progressing. A reporter for the Gazette looked in there this morning to see how much had been done. The parquette is now clear of chairs and over it within a few feet of the roof extends a large scaffold. It is on this that the men are at work. The part of the roof toward Milwaukee street has been entirly removed and new trusses are being put up. These will extend from the Bluff street wall to the new one about eight feet west of the one now used as a support on the side toward Main street. The roof will be replaced piece by piece and after that the refitting is to be commenced. If finished as it is now intended to be the house will have two horse shoe shaped balconies, a dress circle and parquette, and will be one of the handsomest places of amusement to be found in any city of the size in this part of the country.

Premature.

The following dispatch is published in the Madison Democrat, of this morning:

"MILWAUKEE, July 7.—Work is progressing on the line of the Chicago & Northwestern company from Evansville to Janesville, but it is not known exactly when it will be finished. The purpose of the line is to lessen the distance from Chicago to St. Paul. Trains that now go through Harvard and Beloit will leave the old route at Harvard and strike it again at Evansville after passing through Janesville."

A little premature but suggestive of results that will be realized in the very near future, if the encouragement already extended indicates public sentiment. At 10 o'clock this morning more than one-fourth of the tax-payers had signed the petition for the right of way.

Something New.

A late number of the Portage Democrat says that "when the train arrived at Madison from Portage on Thursday morning, the 1st inst., it had aboard four little bright-eyed children, whom some inhuman parent had put aboard just before the train left Portage. The little ones were sisters, the oldest one being seven years of age, but was so badly frightened that she could not tell where she lived. They were neatly dressed, and the younger ones, probably twins, were about three years old and very bright looking. The conductor soon found homes for the little waifs. Two gentlemen of Madison taking one each, a gentleman from Janesville another, and a Prairie du Chien gentleman the fourth. The matter has been placed in the hands of proper authorities and the person or persons who perpetrated the heartless and barbarous deed will doubtless be brought to justice. It is fortunate for the little ones that they have fallen into such good hands."

Haverley's Minstrels.

The Chicago opera house was filled to the doors last night, and would be again and again with the same mirthful and musical attraction. It is but reflecting the popular verdict to say that Mr. J. H. Haverley is furnishing the public with the most admirable minstrel and specialty entertainment that has been upon the boards at any time. The ensemble is superb. The minstrel features are fresh and catchy, the gags new and spicy, the changes alert and the music pleasing. Mr. Haverley could not but enjoy the ovation paid his performance, while the hearty congratulations of his host of personal friends here must have delighted him.—*Chicago Times.*

At Lappin's music hall this evening. Secure your seats in time.

Modern science has been called into soapmaking and Fairbank's Soap is the lead.

The Weather.

At seven o'clock this morning the thermometer indicated 66 degrees above zero. Clear with north wind. At one o'clock p m. the register was 93 degrees above zero. Clear with east wind. For the corresponding hours one year ago the register was 73 and 91 degrees above zero.

Tardy Water Works.

The long continued drouth and intense heat serve to remind people that water works would be very acceptable and suggests the thought that prospective water works are very slow in assuming any thing like tangible proportions. The board of water commissioners are being criticised, for their apparent lack of enterprise and the very conservative spirit which they exhibit. Perhaps it would be wise for a complaining public to remember that it is easy to criticise, but more difficult to execute.

The water supply system when completed means permanence. Not an investment for one year, or five, but for many generations. This being the case thoroughness is necessary on the part of the board, and realizing the fact that the best time to rectify a mistake is before it occurs they propose to do most of their rectifying in advance.

Among the important features, and perhaps the most prominent, is the location of a well and a pumping station.

This work is now engaging the attention of the board. A committee consisting of Messrs. Eldredge, Phelps and Dunniston are canvassing various locations, and will be prepared to report at the next meeting. Among the available sites which the committee have in mind are the fourth ward park, the Conred property on Main street, and the six or seven acres known as the Bump property on the Madison road nearly opposite the residence of Mr. J. D. Rexford.

To the casual observer any one of these locations seem desirable, but a little thought would indicate that the last one named is the most practical.

First, there is an abundance of room at a reasonable price.

Second, it is easy of access by street cars.

Third, the elevation is sufficient to furnish valuable aid to many parts of the city in distributing water.

Fourth, It is on the line of the Evansville cut off, and coal and other supplies can be handled with economy.

There is also sufficient ground to make an attractive park which would add to the beauty of the city. These are a few of the surface reasons which indicate that the location in question is very desirable.

The board of commissioners are certainly competent to decide upon the most feasible location and have doubtless considered all the points of advantage or disadvantage.

The public may be assured, that when the location is settled and work commenced, it will be pushed to rapid and satisfactory completion. By this time next year we will be able to defy the drought, visit St. Paul via Evansville, and ride from the fair ground to the cemetery by rail.

Personal.

—Mrs. J. B. Doe, Jr., arrived in the city last evening.

—O. W. Ray, A. P. Burnham, F. F. Prentice, and O. W. Bemis were at Delavan Lake yesterday.

—Miss Mary Shelton, of Chicago, is in the city, the guest of Mrs. George M. McKey, South Main street.

—Mrs. L. S. Best is in Milwaukee, in attendance at the ninth general meeting of the American Librarian association.

—William V. Morrison, formerly employed by the Janesville Furniture Co., left the city yesterday afternoon for Detroit.

—Mrs. Al. Boomer and children, of Carr, Ill., are visiting in this city, guests of Mrs. Boomer's parents, Mr. and Mrs. G. K. Colling.

—Miss Carrie Young, daughter of Mr. and Mrs. R. P. Young, North Bluff street, is home from Iowa, where she has been for the last month.

—Mr. C. F. Robinson, of the Illinois Central Railroad, is in the city in the interest of the famous Cheltenham Beach, recently opened in Chicago, and known as the Coney Island of the west. This attraction is under the management of the World's Pastime Company. It surpasses anything of the kind before attempted in the west. Don't fail to visit the Beach when in Chicago.

He Killed the Crane.

As one of the prominent members of the Angle Worm club was on his way north about three weeks ago, the train stopped a short distance from the depot at Fort Atkinson and the tourist saw, through the window a large white crane on the edge of a little stream near by A traveling man who was in the same car also noticed it and expressed such a strong desire to have the bird to stuff that the Janesville man said he would get it. He picked up his shot gun, went out on the platform and soon returned with the coveted fowl in his hand. That was the first chapter. The second was commenced by an officer informing him that he was under arrest for discharging firearms within the city limits The crane was a tame one, the owner had made a complaint against its slayer and in the trial which has just been finished the sportsman was fined one dollar and costs. The case has been appealed but before it is heard a suit will probably be commenced by the Fort Atkinson man for damages on account of the loss of his pet. The Angle Worm club is thinking of taking official action in the matter.

—Minstrels at Lappin's hall this evening.

Brodhead.

—The long continued dry, hot weather is telling seriously on the gardens and growing crops.

—"Nedder" Ward, of Magnolia, was thrown from his wagon while returning home last Saturday, striking upon his head and injuring him very seriously. His recovery at last accounts was doubtful. A bolt coming out and letting the tongue of the wagon down caused the accident.

—Thermometer marks 96@103 degrees in the shade.

La Prairie.

—School report of district No. 4, for the month ending July 2nd, 1886: Number of pupils registered, 15; average daily attendance, 12. Names of those that have been neither absent nor tardy: Emma Gardiner, Gracie Gardiner, Leon Chilcott, and Bennie Gardiner.

IDA M. PAUL, Teacher.

—School district Nos. 2 and 4 of the town of LaPrairie, taught by Miss Estelle M. Joiner and Miss Anna Shields, held a picnic on June 25th, at the former's home; There were about 80 in attendance. The two districts were well represented, besides some from Emerald Grove, Darien, Janesville, Delavan, Omaha, Neb., and New York. All seemed to enjoy themselves.

THE PATENT OFFICE.

INVENTORS A CLASS WITHOUT THE MONEY MAKING SENSE.

Patent Lawyers Who Make a Good Deal of Money—Numerous Patents for Railroad Inventions—A List of Queer Patents—Perpetual Motion.

"The extent of the work of the patent office is wonderful, and it increases every year," said a gentleman standing very high in the patent office. There were 6,000 more patents granted last year than there were ten years ago, and the applications filled for patents last year numbered 35,000. The patent office is the only office of the government, I think, that more than pays its expenses. It has a surplus of over $2,000,000 in the treasury department, and it made a clear $140,000 above all its expenses last year."

"Do inventors generally make money out of patents?"

"No, as a rule the money is made by people who buy or swindle the inventors out of their rights. Inventors are nearly always poor men. They work their brains for their bread and butter. They are a visionary set of fellows, and have not the money-making sense. They get in with business men in order to develop their patents, and these endure them out of their profits. The man who invented the elevated railroad in New York died a poor man, and while he was alive the people laughed at his idea. It is so with hundreds of other patents, and if you will look over the history of the patent office you will find it is the business men who make the money, while the inventors do the work.

"Some patent lawyers make a great deal of money, and there are a number in Washington who have grown wealthy in the practice. There is a man here who has made a fortune in the patent law. He had something to do with the Goodyear rubber patent, and he has been prospering ever since. He owns a fine mansion on Seventeenth street, and tried the experiment one time of making a stable for his horses in the basement All the modern improvements, however, in the shape of water would not do away with the smell, and he finally gave it up as a bad job. Many patent lawyers, when they see that a man has a good thing, contract with him to get out his patent for a certain amount of money and some shares in the stock of the patent. They get paid for their work with the money and have a fair chance of making a fortune out of the patent if it turns out well. There are hundreds of patent lawyers in Washington. Many of them are smart fellows and all of them are making money.

NUMEROUS RAILROAD PATENTS.

"I see they talk about having cable street railroads here. Is there much advancement in this line of patents?"

"Yes, indeed; there is a great deal. The cable road is a comparatively recent invention, and there are hundreds of patents filed for grips and other things connected with it. You would be surprised to know how many patents are applied for railroad inventions. Now ideas for rails, switches, and ties are being put forward every day. The railroad tie of the future is yet to be patented. It requires very good hard wood to make a tie, and this class of wood is being fast cut out of the country. Railroad building has reached such a point that there is not enough wood to supply the ties, and a new invention has got to be made. There are now something under 300,000 miles of railroad in the world, and about 130,000 miles of these are in the United States. Ties wear out, and the time will come when there will be no wood to replace them. We have already patents given out on glass ties, ties of iron, and ties made of paper and wood pulp. Another set of articles that has been patented largely of late years in fences and fence post. The old wooden fence has seen its best days, and the wire fence is rapidly taking its place."

"A great many inventors devote themselves solely to making patents for kitchen utensils, and other work upon machines relating entirely to water. A great many of the railroads and machine shops and factories of various kinds keep inventors who do nothing else but work upon the specialties of the factories in which they are employed. Women make a great many patents, but these deal chiefly with household matters, or with their own work. There has been a great deal of electrical invention during the past few years, and it is perfectly wonderful how rapidly patents come in after any success in any particular branch of invention. A great accident always brings in patents to prevent its occurrence in the future, and when a big fire occurs at any of the big hotels with a great loss of life the fire escapes roll in by the hundreds."

"Have you many patents for perpetual motion?"

"Yes, hundreds are applied for, but they are not granted. I remember once a man walked from Kentucky to Washington to patent a perpetual motion, and one of your Ohio newspaper men, not long ago, telegraped to the Associated Press that the invention of perpetual motion had at last been conceived somewhere in Ohio. I should think that Washington would be a good place for an inventor to work. By going to the patent office he could see all that had already been done in the line upon which he was working, and he might see where a cog here and a wheel there would perfect some patent which would then be worth tens of thousands of dollars where it is now worth nothing."—"Carp's" Letter in Cleveland Leader.

A New and Successful Motor.

The New Orleans Picayune gives a long account of a trial on one of the street railroads of that city of a motor propelled by ammonia gas, the trial having in every way proved perfectly satisfactory and successful. This gas, which is little more than one-half the weight of air, is powerfully expansive, and when passed through the cylinders of a steam engine will operate just the same as steam in moving machinery. In order to utilize this gas it is stored in a strong iron reservoir which is carried under the floor of a car and is supplied to the engine just as steam is used from a boiler. In order to be able to carry enough of the gas to drive the machinery for any considerable time the gas is forced by powerful pumps into the reservoir on the car until a pressure of from 180 to 200 pounds to the square inch is reached, its force being indicated by a gauge, much the same as a steam gauge. Each car is supposed to carry enough gas to make a round trip. There is, of course, no fire, smoke, steam nor heat, and the propelling appliances are compactly stored beneath the floor of the car, which in external appearance or internal accommodation, is in no way different from the ordinary street cars, save that it stands a little higher on its wheels to make room for the machinery underneath. The engineer or driver sits on the front platform which is no more encumbered than is the platform of a horse car, and by means of a couple of levers he reverses and forwards the engine movement at will, while a throttle valve controls the admittance of gas to the engine in much the same way as steam is managed. Right here comes in a great item of economy. The ammonia gas after passing through the engine and doing its work is not lost by being allowed to escape into the atmosphere, but is saved by simply turning it into an air-tight water tank carried under the car. The gas has such an affinity for the water that the latter will absorb 700 times its bulk, ten cubic feet of water taking up 7,000 feet of the gas which is extracted from the water and is again utilized in driving a car.

The above may interest some Janesville capitalist who may have a desire to obtain a controlling interest in the street car line.

How to Write an Oration.

The recent examples of college oratory in Minneapolis and St. Paul call to my mind the instructions of the late Professor Moses Marston, of the State university, to his class in regard to writing orations. He said: "You might, in the first place, write an introduction—something pretty, rather flowery. Then write a peroration. Make it rather eloquent, adorned with the figures of speech. Then briefly summarize the ideas which you have collected in regard to your subject, put them in plain, straitforward English, terse, brief and to the point. That is for the body of your oration. Then cut out the introduction and the peroration and recite the brief statement of the facts of the case and you will do yourselves credit."—Pioneer Press "Listener."

Fairbank's Soap shows the march of progress. It's an improvement over old kinds.

LOCAL MATTERS.
